# Muhammed Rabeeh PK
**Full-stack developer**

I am a Python Django + React fullstack developer with experience in both team and solo projects. After graduating, I joined a self-learning training program that simulated a corporate environment. This made me adept at quickly learning new programming languages and tools. Now, I am seeking a challenging role in fullstack or frontend development to apply my technical skills

## Pojects

### 🔗 Nearshop.online

Multi-vendor eCommerce application. This project is meant to connect shops and customers. integrated billing management for shops.

Skills: **React, Django, PostgreSQL, RestApi, JWT, Google Maps, Google auth, Firebase, AWS, Gunicorn, Github, git, Bootstrap, Phone OTP auth, Razorpay.**

- 3 types of users can join (customers, shoppers, owners ).
- 4 types of authentication were used in this project based on users ( phone OTP, Google auth, email and password, username and password ).
- Google Maps integration is used to connect customers to the nearest shops.
- The owner can manage multiple shops. The shop can manage billing, orders, and payments.
- The Global product concept helps to reduce duplicate product entry.

### 🔗 University Manager ( on progress )

This project is for the Junior College coordination of Jamia Nooriyya. I studied there for 8 years. I planned to computerize this system, which is a significant achievement for me. 60+ junior colleges, 5300+ students, 3 courses.

Skills: **Next JS, Type Script Django, PostgreSQL, Redux, RestApi, JWT, Github, git, Tailwind, NextUI, Framer-motion, Jodit editor, Theams, Axios.**

- 4 user sections included ( Admin, College, Teacher, Student ).
- Admin manages colleges, students, exams, entrance, and results.
- I am planning to implement a barcode system for the exam.

### 🔗 Modapps.in ( freelance )

Appstore and blog website.

Skills: **React vita, Django, PostgreSQL, Redux, RestApi, JWT, Google Analytics, AWS, Gunicorn, Github, git, Tailwind, NextUI, Framer-motion, Jodit editor, Theams, Axios.**

- Admin can manage and apps post and blogs.
- I implemented Google Analytics to understand traffic views.
- NextUI and Framer motion are implemented for a better user experience.
- Jodit text editor tool implemented to write blogs.
- Hosted this website on AWS.

### 🔗 Hotler  (frontend)

this website helps cafes, messes, hotels, and restaurants. we planned to implement a QR ordering system without customer authentication.

Skills: **Next JS, Next UI, Framer-motion, firebase storage, google map, Chart.js, next-auth, next-themes.**

- framer motion integrated for frontend animation.
- subscription setup for shops.

## Mini prjects

### 🔗 OLX - redesign

Redesign OLX.

Skills: **React vita, Firebase, Axios, Vercel,**

- Convert the user interface to a modern look.
- Firebase used for auth and store data.

### 🔗 Metrix game

1024 game.

Skills: **React vita, react-swipeable, metrix, react-howler**

- Build algorithm for metrix calculation and alignment.
- Use valuable NPM modules for trach swaping and music play.

## Skills
### Programing Languages
- Python
- Java script
- c (basic)
- java (basic)
- HTML
- CSS

### Database
- PostgrSQL
- MongoDB

### Framework & Library
- React JS
- Next JS
- Django
- Rest API
- Bootstrap
- Tailwind,
- NextUi
- Shadcn

### Hosting
- AWS (EC2)
- Hostinger,
- Vercel,
- Github pages
- Nginx (basic)
- Godady
- Digitalocean

### Other
- DSA
- Gunicorn
- Comunication
- Axios
- yarn
- Typing (3 Lug)

### Tools and Software
- Figma
- Canva
- Adobe Photoshop
- Adobe Publisher
- Video editing ( intermediate)
- MS Office
- Adobe XD

## Educational Background
**Course : Full-stack**
Brototype ( Bootcamp )
2023 - 2024
- A Self-learning Program.
- I specialized in Python Django and React JS.

**Degree : BA Arabic**
University of Calicut
2020 - 2023
- Arabic language and History.
- Personal developments.
- Groupwork and leadership

## Languages
- Malayalam (Native)
- English (speak and write)
- Arabic (Read and write)
